# INDEX

Action potential
  depression, auditory masking duration effect, 988
  depression, auditory masking intensity effect, 1001
Acoustic stimulation
  long-duration, response of superior olivary neurons to, 706
ADRIAN, H. O., 706
Afferent fibers: *see also* Nerve fibers
  spinal cord, cortically evoked depolarization, 63
Afferent nerve
  stimulation of, effect on Renshaw cells, 1063
Afterdischarge
  photically evoked, origin of in visual cortex, 1048
ALBERTS, W. W., 546
Alpha motoneurons
  cerebellar stimulation sites affecting, 210
  hind-limb, cerebellar control of, 172
  stretch reflexes, gamma loop interruption on cerebellar control of, 193
AMES, A. III, M. SAKANOUE, AND S. ENDO. Na, K, Ca, Mg, and Cl concentrations in choroid plexus fluid and cisternal fluid compared with plasma ultrafiltrate, 672
Amygdala
  heart rate after electrical stimulation, 893
ANDERSEN, P., J. C. ECCLES, AND Y. LØYNING. Location of postsynaptic inhibitory synapses on hippocampal pyramids, 592
ANDERSEN, P., J. C. ECCLES, AND Y. LØYNING. Pathway of postsynaptic inhibition in the hippocampus, 608
ANDERSEN, P., J. C. ECCLES, T. OSHIMA, AND R. F. SCHMIDT. Mechanisms of synaptic transmission in the cuneate nucleus, 1096
ANDERSEN, P., J. C. ECCLES, R. F. SCHMIDT, AND T. YOKOTA. Slow potential waves produced in the cuneate nucleus by cutaneous volleys and by cortical stimulation, 78
ANDERSEN, P., J. C. ECCLES, R. F. SCHMIDT, AND T. YOKOTA. Depolarization of presynaptic fibers in the cuneate nucleus, 92
ANDERSEN, P., J. C. ECCLES, R. F. SCHMIDT, AND T. YOKOTA. Identification of relay cells and interneurons in the cuneate nucleus, 1080
ANDERSEN, P., J. C. ECCLES, AND T, A, SEARS. Cortically evoked depolarization of primary afferent fibers in the spinal cord, 63
ANDERSEN, P., J. C. ECCLES, AND P. E. VOORHOEVE. Postsynaptic inhibition of cerebellar Purkinje cells, 1138
Anesthetic: *see* Thiamylal sodium
Antidromic stimulation
  response of cortical pyramidal tract neurons, 828
ANTUNES-RODRIGUES, J., 394
Auditory cortex
  ablation, effects on binaural time differences, 15
Auditory masking
  physiological observations of, 988, 1001
    duration effect on action potential depression, 988
    intensity effect on action potential depression, 1001
Auditory nerve
  action potentials, masking duration effect on, 988
  action potentials, masking intensity effect on, 1001
  primary, fiber discharge pattern and inhibition, 768
Auditory stimulation
  and responses in opossum thalamus, 1026
  medullary response to monaural and binaural, 1174
  wave activity in superior olivary complex after, 814
Augmenting responses, cortical
  synaptic activities and, 133
Axons: *see also* Nerve fibers
  optic tract, visual receptive fields of, 1154

BALVIN, R., 334
Barbiturate
  sensitivity, of visual receptive fields, 1154
Behavior
  avoidance, after mammillothalamic tractomy, 753
  in chronic decerebrate animal, 635
  sympathetic enhancement of sensory input in arousal, 493
BELL, C., G. SIERRA, N. BUENDIA, AND

J. P. SEGUNDO. Sensory properties of neurons in the mesencephalic reticular formation, 961
BIGNALL, K. E. AND L. T. RUTLEDGE. Origin of a photically evoked afterdischarge in cat visual cortex, 1048
BISHOP, G. H., 788
Blood pressure
septal area stimulation effect on, 394
BOUDREAU, J. C., 814
Brain stem
neuronal auditory responses, 1174
superior olivary complex, response to long-duration acoustic stimuli, 706
wave activity in superior olivary complex, 814
BROOKS, C. McC., 878
BROWN, K. T., 682
BUENDIA, N., 961

Calcium
concentrations in CSF, compared with plasma ultrafiltrate, 672
Central nervous system
neuroglia and extracellular space in leech, 645
of leech, electron microscopic study of, 229
of leech, physiological properties and neuron-glia relationship, 290
Cerebellar ablation
auditory cortex, and tonal pattern discrimination, 15
stretch responses during chronic, 49
Cerebellar stimulation
localization of motor effects of, 210
of $\alpha$-motoneuron stretch reflexes, gamma loop section effect on, 193
response of alpha and gamma motoneurons to deep, 172
Cerebral cortex
area 4, excitation of, events following, 334
association area, convergence upon neurons of, 620
auditory field, representation in primitive mammal, 37
primitive mammal (echidna), representation in, 37
sensorimotor field, representation in primitive mammal, 37
stimulation of, causing depolarization of primary afferent fibers, 63
visual field, representation in primitive mammal, 37
Cerebrospinal fluid
electrical potential of, 942
electrolytes in, compared with plasma ultrafiltrate, 672
CHERNETSKI, K. E. Sympathetic enhancement of peripheral sensory input in the frog, 493
Chloride
concentrations in CSF, compared with plasma ultrafiltrate, 672
CLARE, M. H., 788
COATS, A. C. Physiological observations of auditory masking. I. Effect of masking duration, 988
COATS, A. C. Physiological observations of auditory masking. II. Effect of masking intensity, 1001
COGGESHALL, R. E. AND D. W. FAWCETT. The fine structure of the central nervous system of the leech, *Hirudo medicinalis*, 229
Color discrimination
behavioral evidence for, in cat, 323
Conduction
saltatory, action currents developed by single nodes of Ranvier, 1199
Conscious sensation
levels of, produced by stimulation of human somatosensory cortex, 546
Convergence
inhibitory, on Renshaw cells, 1063
upon association cortex neurons, 620
COOTE, J., 107
Cortical intracellular potentials
during augmenting and recruiting responses, 117, 133
hyperpolarizing currents on evoked membrane potential changes, 117
synaptic pattern in pyramidal and nonpyramidal tract neurons, 133
COVIAN, M. R., J. ANTUNES-RODRIGUES, AND J. J. O'FLAHERTY. Effects of stimulation of the septal area upon blood pressure and respiration in the cat, 394
COWEY, A. Projection of the retina on to striate and prestriate cortex in the squirrel monkey, *Saimiri sciureus*, 366
Cuneate nucleus
depolarization of presynaptic fibers of, 92
relay cells and interneurons in, 1080
slow waves by cutaneous volleys and cortical stimulation, 78
synaptic transmission in, mechanism of, 1096

Decerebrate animal
behavior in extended survival, 635
DELATTRE, L. D., 546
Depolarization
of presynaptic cuneate nucleus fibers, 92
presynaptic, by cortex, 63
DIAMOND, I. T., 15, 1026
Discharge
of primary auditory fibers, 768

Dorsal root viscerotomes
relation to gastrointestinal tract, 107
Dow, R. S., 172, 193, 210
Downman, C. B. B., 107
Dubner, R. and L. T. Rutledge. Recording and analysis of converging input upon neurons in cat association cortex, 620

Eccles, J. C., 63, 78, 92, 592, 608, 1080, 1096, 1138
EEG: *see* Electroencephalogram
Eighth nerve: *see* Auditory nerve
Electrical potential
of cerebrospinal fluid, 942
Electrical stimulation
human somatosensory cortex, levels of conscious sensation produced by, 546
of amygdala, heart rate following, 893
of optic nerve and retina, intraretinal response to, 682
of septal area, effect on blood pressure and respiration, 394
vestibular and muscle nerve, effect on pyramidal tract neurons, 481
Electroencephalogram
theta rhythm from hippocampal pyramidal neurons, 1011
Electrolytes: *see also* Calcium; Chloride; Magnesium; Potassium; Sodium
in cerebrospinal fluid, compared with plasma ultrafiltrate, 672

Erickson, R. P., J. A. Jane, R. Waite, and I. T. Diamond. Single neuron investigation of sensory thalamus of the opossum, 1026
Evarts, E. V. Temporal patterns of discharge of pyramidal tract neurons during sleep and waking in the monkey, 152
Evoked potentials
cortical, form and distribution under polarizing currents, 788
nonstriate, by retinal projection, 366
postsynaptic, in corticospinal neurons during augmentation and recruitment, 133
transmembrane, and hyperpolarizing currents, 117
Excitation
electrical, of pyramidal motor cortex neurons, events following, 334
synaptic, of pyramidal motor cortex neurons, events following, 334
Eyzaguirre, C., 464

Fawcett, D. W., 229
Feinstein, B., 546
Fencl, V., 942
Frank, K., 913, 928
Fujita, Y. and T. Sato. Intracellular records from hippocampal pyramidal cells in rabbit during theta rhythm activity, 1011

Gamma loop
section of, effect on cerebellar stimulation of $\alpha$-motoneuron stretch reflexes, 193
Gamma motoneurons
cerebellar stimulation sites affecting, 210
hind-limb, cerebellar control of, 172
Gastrointestinal tract
dorsal root viscerotomes and, 107
Geniculate body
lateral, visual receptive fields of cells of, 1154
Glaser, G. H., 49
Glial cells
and neurons, ionic composition in leech CNS, 645
in leech CNS, neuron-glia relationship, 290
